

Evolutent4 Wireless

An ergonomic vertical mouse

 BAKKER ELKHUIZEN

Work Smart - Feel Good

Design, comfort and relaxed working all in one

We use our mouse a lot throughout the day. It is therefore essential to use a high-quality ergonomic model.

This wireless Evolutent 4 is a vertical mouse. You hold the mouse in a "handshake" position.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

[Read more online](#)

Ergonomic: supports your hand in a fully upright neutral handshake position that eliminates forearm twisting.

Precise: true optical resolution sensor moves the pointer quickly to reduce hand movements, with short habituation time.

Grip: the Evolutent 4 Wireless has an improved grip, making it more comfortable for your thumb and little finger.

Adjustment: version 4 convenient adjustment: of pointer speed.

BNEEVRSW: Evolutent4 Small Wireless version available.
