

Evoluent C

An ergonomic vertical mouse

 BAKKER ELKHUIZEN

Work Smart - Feel Good

Prevent wrist and shoulder problems with a vertical mouse

It is important to use a good ergonomic mouse during our daily computer activities. One option is the Evoluent C, a vertical mouse.

A vertical mouse is held in a handshake position, which results in less lateral wrist-bending and forearm rotation.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

Ergonomic: improved arm and wrist posture thanks to the smaller angle

Aesthetic: modern design with a deluxe look

Improved: less spherical, which gives a better fit with the palm.

Design: longer buttons for a better grip.

Convenient: integrated solution for immediate adjustment of cursor speed.

Accurate: the Evoluent C works fast and is very accurate.

Width	90 mm (3.54 inches)
Height	80 mm (3.15 inches)
Depth	119 mm (4.69 inches)
Weight	168 gr (5.93 ounces)
Product code	BNEEVRC
